Ethical Information

Privacy: No personal identifiers are included in the data, keeping all participants' information private.

Transparency: The United States Census Bureau (source of our data) bases its information products on reliable, accurate data that has been validated.

Reliability: The data is from accountable government affiliated sources, so the data itself is assumed to be accurate. However, the combined dataset wasn't merged by the government affiliated sources, but was instead created by students.

Fairness and Non-discrimination: Efforts made to avoid biases in data collection and data merging.

Concrete Information

Range of time: 2011-2021, but 2020 is omitted for income data because there is no provided census data.

Primary Data: Prices of different food items in the United States, obesity rates of states, and median income of households for states.

Additional included info: census regions, sample sizes, income level

Examples of food columns:

- Flour, white, all purpose, per lb.
- Cookies, chocolate chip, per lb.
- Bacon, sliced, per lb.
- Potatoes, white, per lb.

Number of columns: 102

Number of rows: 559
